Customer No.: 26021

# REMARKS

This application has been carefully reviewed in light of the Office Action dated January 23, 2008. Claims 1-18 remain in this application. Claims 1 and 2 are the independent Claims. Claims 1-18 have been amended. It is believed that no new matter is involved in the amendments or arguments presented herein.

Reconsideration and entrance of the amendment in the application are respectfully requested.

## **Non-Compliant Amendment**

The response filed April 23, 2008 was objected to for improper strikethrough of words and characters having 5 or less characters. In response, Claims 1-12 are amended to recite double brackets where five or less characters are to be deleted. Reconsideration and withdrawal of the above objections are thus respectfully requested.

## **Interview Summary**

Applicant thanks the Examiner for the courtesies extended during the telephone interview of April 16, 2008. Applicant has amended the claims as discussed during the telephone interview and, as also discussed during the telephone interview, submit that those claims are now in condition for allowance.

## **Non-Art Based Rejections**

Claims 1-18 were rejected under 35 U.S.C. §112, second paragraph, for indefiniteness. In response, Applicant has amended the claims to overcome the above rejections.

With respect to Claim 1, that claim has been amended to clarify the instruction codes are fetched and stored in the instruction queue, in order to overcome the rejection in paragraph 7.a. on page 3, lines 8 to 18 of the Office Action. In addition, Claim 1 has been amended to make clear that "based on" modifies "read out," an "instruction code" is read out from a memory and a "fetch circuit" fetches an "instruction

Appl. No. 10/601,005

code" in the instruction queue, in order to overcome the rejection in paragraph 7.c. on page 3, line 19 to page 4, line 4 of the Office Action.

With respect to the rejection in paragraph 7.d. on page 4, lines 5 to 7 of the Office Action, it appears that the Office Action misunderstands the present invention. Applicant states that the branch setting instruction explicitly or implicitly covers the information concerning the branch occurring address 314, 414 and the information concerning the branch target address 316, 416, as illustrated in Figs. 3B and 5B. Moreover, the branch occurs when the fetch address matches with the branch occurring address. In other words, unlike the Office Action's contention, the branch occurring address is neither the address in the memory where the branch instruction is stored, nor the (branch) target address that is encoded in a branch (setting) instruction. Such branch occurring address is, for instance, address P1 in Fig. 3C, where the branch occurs. Applicant respectfully submits that in view of this feature amended claims 1 and 2 clearly specify that the branch occurring address is an address where the branch occurs, by "a branch to the branch target address occurring when the fetch address is the branch occurring address after a x-th instruction from the branch setting instruction."

Regarding Claim 2, that claim has been amended to overcome the rejection in paragraph 7.e. on page 4, line 8 of the Office Action.

Similarly, Claims 3 to 18 have been amended to clarify the recitations and to overcome the rejection in paragraph 8.a. on page 4, lines 9 to 14 of the Office Action.

Reconsideration and withdrawal of the above § 112 rejections are respectfully requested.

### Conclusion

In view of the foregoing, it is respectfully submitted that the application is in condition for allowance. Reexamination and reconsideration of the application, as amended, are requested.
